

PROJECT TITLE: Libro Para Niños

COURSE: Spanish 2 Honors

INSTRUCTOR: Mr. Herget

## DRIVING QUESTION

How can I write a children's book in Spanish?

## PROJECT SUMMARY

Students will create a children's book in Spanish. They will read the books to a class of elementary school aged immersion students and get feedback.

## REAL-WORLD CONTEXT

Students will be writing children's books that will be read to and assessed by Spanish speaking children. The books will also go on display in the library so they can be read by the younger siblings of Spanish speaking students during open house, flight school, etc.

## PRODUCTS & AUDIENCE

Students will write a children's book in Spanish and share it with Spanish-speaking students at Smith Elementary.

## STUDENT REFLECTIONS

- "It helped us be creative in using our vocab."
- "I learned how to split up work and how to appeal to younger audiences."
- "It was fun to share our work with elementary students at Smith that actually speak Spanish and gave feedback."
- "Having my teacher and our audience critique our books helped us."

## NC PORTRAIT OF A GRADUATE SKILLS GAINED

COLLABORATION

COMMUNICATION

PERSONAL RESPONSIBILITY

## TEACHER REFLECTION

The final product for this project was pretty good looking for most groups. For the future I need to give more time because of technical challenges. I also would like to somehow refine my survey form to get better feedback from the elementary students. I think that's it.
