

Step into education, adventure, & fun this summer!

### Admitted to NCSU for Fall 2019?

We are so excited that you are joining us at NC State! We would like to invite you to apply for the **2019 Colorado GeoJourney** - NC State's only **immersive geosciences field course for incoming first-year students**. Each year the Department of Marine, Earth, and Atmospheric Sciences partners with the University Scholars Program to facilitate this experience that builds an immediate community with a group of your peers, brings the geosciences to life through a **two-week field course**, and starts your college career with **3 credit-hours of coursework**. You can:

- Get to know an amazing cohort of curious adventurers just like you.
- Earn 3 credit hours in Geology that may fulfill a GEP requirement.
- Spend 2 weeks learning & exploring along the iconic Colorado River.
- Learn how geoscience will be essential in shaping our future world.

If you crave education in action, the outdoors, and building community, then you should consider this opportunity to learn how the geosciences are utilized in multiple facets of daily life. GeoJourney explores the relationships between the geosciences and society along one of North America's greatest waterways - the Colorado River.

When?: **Thursday, July 25th, 2019 - Saturday, August 10th, 2019**

Cost: **\$1700\***

Includes airfare, ground transportation, camping accommodations, meals and more

**Diversity scholarships available!**

**Apply by May 16th!**

Acceptance notifications will be sent May 17. Commitment and payment are due June 1.
