

Update on Heat at Carroll MS

Carroll Magnet Middle School Families,

I want to provide an update on our heating system repair.

WCPSS Facilities Maintenance determined that the school's fire alarm system was malfunctioning, keeping our air-handling units offline. The system's controls have been reset, and the temperature in our building is rising. Our building will be warm and ready for students and staff tomorrow morning on our normal schedule.

Thank you for your continued support of our school.

Sincerely,

Tina Zarzecki, Principal
